

Partner Identification Form

“From Seed to Skill: Connecting Green Innovation, Hands-on STEAM, and Sustainable Futures” — your experienced Greek partner for Erasmus+ School Education cooperation partnerships (KA210-SCH · KA220-SCH).

HANDS-ON STEAM · PROJECT-BASED LEARNING · GREEN SKILLS · SUSTAINABILITY · DIGITAL EDUCATION · WELLBEING AT SCHOOL · URBAN FARMING & SCHOOL GARDENS · HEALTHY LIVING · CIRCULAR ECONOMY · INCLUSION · TEACHER CPD

A. Partner organisation

Organisation ID (OID)	E10172681
PIC	909448430
Full legal name (National)	ΕΥΡΩΠΑΙΚΟ ΕΘΕΛΟΝΤΙΚΟ ΚΑΙ ΕΚΠΑΙΔΕΥΤΙΚΟ ΚΕΝΤΡΟ
Full legal name (Latin)	ΕΥΡΩΠΑΙΚΟ ΕΤΗΕΛΟΝΤΙΚΟ ΚΑΙ ΕΚΠΑΙΔΕΥΤΙΚΟ ΚΕΝΤΡΟ
Name (English)	European Voluntary and Educational Center — EVEC Athens
Acronym	ΕΕΕΚ Athens / EVEC Athens
National ID	31766
VAT	997127685
Address	Str. “Kallistratous” No89, 157 71 Zografou, Athens
Country / Region	Greece / Attiki
Website	https://evec.org.gr www.microgreens.org.gr
Email	erasmus@evec.org.gr
Telephone	+30 697 777 0708

B. Profile

Type of organisation	Non-Governmental Organisation (NGO)
Public body?	No
Non-profit?	Yes
School Education roles	Full partner in KA210-SCH small-scale partnerships and KA220-SCH cooperation partnerships. Within a KA220 partnership we also host the transnational project meetings and the learning/teaching/training activities (LTTAs) assigned to us, in Athens. (Any organisation may partner — no School accreditation required.)
Primary fields	Hands-on STEAM & project-based learning, Green Skills, Urban Agriculture & School Gardens, Sustainability, Digital Education, Wellbeing & Healthy Living, Circular Economy, Cooking & Nutrition, Inclusion, Teacher CPD.
Educational toolkit	Microgreens-based non-formal education (proven flagship), expanding into mycelium & biomaterials, renewable energy (solar), and drones & STEAM — a growing set of hands-on tools that add green, digital and innovation value to partner projects.

Open resources	Microgreens Resource Portal — www.microgreens.org.gr : open-access hub for microgreens-based educational tools, curricula and classroom methodologies (in development).
-----------------------	---

◆ C. Accreditation

Erasmus+ KA1 Youth	YES — 2023-1-EL02-KA150-YOU-000188397 (valid until 2027)
ESC Quality Label	YES — 2023-1-EL02-ESC50-QLA-000195138 (valid until 2027)
EU grants received	YES — 20+ Erasmus+ and ESC projects since 2017 (see Sections E and F)
School Education eligibility	Fully eligible as a KA210-SCH / KA220-SCH partner — no separate School accreditation is required to partner on these cooperation actions.

◆ D. Background and experience

About the organisation

European Voluntary and Educational Center Athens (EVEC Athens / EEEK Athens) is a non-profit **education NGO** based in Athens, Greece, accredited for Erasmus+ Youth (KA1) and the European Solidarity Corps, and an active **partner and host for Erasmus+ School Education**. We work at local, national and European levels in hands-on education, environmental sustainability, STEAM and active citizenship — including interactive workshops delivered directly in schools.

Since its founding, EVEC has built its identity around one core principle: young people learn best by doing. Every programme we design translates complex themes — from sustainability and circular economy to digital skills and entrepreneurship — into tangible, hands-on experiences where participants create, grow, measure and market real products.

What EVEC brings as your partner

As an experienced Greek education NGO, EVEC joins your School Education project as a full partner in **KA210-SCH and KA220-SCH** cooperation partnerships. We both complete ready projects and strengthen ideas still taking shape, contributing concrete, well-defined work packages that an evaluator can score against:

- **Hands-on workshops as project activities & outputs** — our seed-to-plate microgreens methodology built into your work packages as classroom activities and transferable results.
- **Hosting in Athens (within KA220)** — we host the transnational project meetings and the learning/training activities (LTTAs) assigned to us, with venue, logistics and an experienced team on the ground.
- **Project-based STEAM for pupils** — experiential, cross-curricular workshops with clear, documented learning outcomes.
- **A green, digital & innovation toolkit** — microgreens (proven), with mycelium, solar and drones, serving the EU green and digital priorities.
- **Dissemination & visibility** — multilingual channels and the open library at microgreens.org.gr.

This makes EVEC a versatile partner for any KA210-SCH or KA220-SCH School Education project addressing the green transition and climate, STEM/STEAM, digital skills, basic skills and key competences, wellbeing at school, inclusion, or healthy, sustainable living.

Microgreens as a cross-cutting educational methodology

EVEC has developed a unique pedagogical model that uses microgreens cultivation as the connecting thread across multiple learning domains — delivered directly in the classroom. A single growing cycle — from seed to harvest in 7–14 days — becomes a practical learning laboratory that simultaneously teaches:

- **Environmental awareness & green skills:** water-efficient soilless growing, waste reduction, biodiversity, sustainable food systems and climate-adaptive agriculture.
- **STEM & digitalisation:** sensor-based monitoring (pH, humidity, temperature), data collection and interpretation, basic IoT concepts and digital documentation.
- **Entrepreneurship & circular economy:** cost calculation, pricing, branding, market testing, social-impact measurement, value-added products and cooperative business models.
- **Employability & key competences:** practical, transferable skills — from running a small growing system to food-safety basics and “seed-to-market” pathways — that build young people’s confidence and strengthen their CVs.
- **Urban farming & sustainability:** indoor, small-space systems that need no arable land, use up to 90% less water, and replicate in any urban context.
- **Inclusion & empowerment:** all activities accessible to pupils and learners with fewer opportunities, including migrants and those with limited formal education.

Beyond microgreens — an expanding educational toolkit

Microgreens is our proven flagship; we are extending the same hands-on, science-made-simple approach into emerging fields, so partners can choose the tool that best fits their priorities:

- **Mycelium & biomaterials** — growing materials from fungi as a tangible route into the circular economy, sustainability and green innovation.
- **Solar & renewable energy** — buildable, hands-on projects that bring the green and digital priorities together and make clean energy tangible for young people.
- **Drones & STEAM** — digital skills, technology and data literacy, with green monitoring and mapping applications.

Each tool is delivered as a co-designed workshop set plus a transferable result (toolkit + methodology) that partners can place directly into their work packages.

Cooking, nutrition and food culture

EVEC extends the microgreens cycle from seed to plate. Participants learn the nutritional properties of microgreens, prepare meals from their own harvest, and explore food as a vehicle for health education, cultural exchange and social inclusion. EVEC is developing a Microgreens Cookbook connecting growing with healthy eating and intercultural food exploration.

Activities and experience relevant for partnership

- **Microgreens for Youth Workers** — KA1 Training Courses using microgreens as a non-formal method for sustainability, teamwork, nutrition, climate awareness and entrepreneurship.
- **Microgreens in Schools** — a hands-on, seed-to-plate workshop delivered at Kanasi School in Athens for European Youth Week 2026: students aged 14–15, in groups of three, sowed seeds, cared for their trays over nine days, harvested, presented and cooked what they grew — building green and digital skills. Proven, transferable methodology we bring into a School Education partnership.
- **Green Social Entrepreneurship** — e.g. “Plant, Market, Sell”: real small-scale green business models, pricing, branding and cooperative structures.
- **Cooking & Nutrition Education** — cooking sessions integrated into programmes; the Microgreens Cookbook in development.

- **Urban Sustainable Actions** — rooftop pilots, school gardens, park-based events and community awareness campaigns.
- **Inclusion & Empowerment** — activities designed for youth with fewer opportunities, NEETs and migrants, using mentoring and peer-learning.
- **Tool & Resource Development** — Growing Guide, Entrepreneurship Toolkit, Cookbook, school toolkits, visual guides and video OER on microgreens.org.gr.

Team roles & capacity

EVEC fields a complete team covering every role needed to deliver a School Education partnership (KA210-SCH / KA220-SCH) to a high standard:

- **Project Coordinator** — overall coordination, partner liaison, work-plan and timeline management, quality assurance, budget management and reporting; experienced across KA1, KA2 and ESC.
- **Educational / Pedagogical Lead** — designs the learning programme, objectives and key competences; safeguards methodology and documented learning outcomes.
- **Trainers & Educators** — deliver experiential, hands-on sessions, facilitate group dynamics and intercultural learning, and support participants throughout the activity.
- **Participant Recruitment & Preparation Officer** — recruits and selects participants (including young people with fewer opportunities) and runs pre-departure and group preparation.
- **Logistics & Operations Coordinator** — organises mobility, accommodation, venue, materials, equipment, health & safety and documentation.
- **Inclusion Officer** — ensures activities are accessible to NEETs, migrants and participants with fewer opportunities, with appropriate support and adaptations.
- **Communication & Dissemination Officer** — leads visibility, digital storytelling, multilingual dissemination and open educational resources (microgreens.org.gr).

The team has worked together across 20+ Erasmus+ and ESC projects since 2017, ensuring efficient coordination and reliable, high-quality delivery.

◆ E. Erasmus+ / ESC projects applied by EEEK Athens

EVEC's delivered Erasmus+ portfolio to date is in the Youth, VET and ESC fields; the same proven, hands-on methodology — including our in-school microgreens workshops — transfers directly to School Education partnerships (KA210-SCH / KA220-SCH).
